

F&A Trading Commodities List (2026)

Introduction

F&A Trading, a division of F&A Engineering, specializes in the international supply and distribution of a diversified portfolio of industrial petrochemical and edible commodities. Our product range covers essential raw materials and energy resources including coal, iron ore, copper, bauxite, granular sulphur, fertilizers (Urea N46, DAP), petroleum derivatives (bitumen, petroleum coke, EN-590 diesel, jet fuel, and crude oil), as well as high-demand edible products such as sunflower oil, soybean oil, and Brazilian ICUMSA sugar grades.

Through strong partnerships with reputable producers and refineries across Tanzania, Kazakhstan, Oman, Russia, Ukraine, and Brazil, F&A Trading ensures consistent quality, competitive sourcing, and reliable supply chains tailored to meet the requirements of industrial, commercial, and governmental clients worldwide.
